

# Invitation for WEB Presentations

Iwata Bolt Co., Ltd. SOFI Section

Due to the spread of COVID-19, many businesses are facing major obstacles in conducting corporate activities due to travel restrictions. We sincerely hope this pandemic will end soon, and your health and safety will continue to be our top priority.

Conventionally, Iwata Bolt has actively engaged with our customers on new product development and cost improvement projects by introducing VAVE cases and original patented products through personal visits with the Iwata Bolt SOFIT car. However, taking into consideration the current situation, we would like to invite you to an online presentation.

Since an online presentation allows multiple participants to meet at the same time from anywhere, we hope to reach and engage more customers, who normally don't have the time and opportunity to learn about "screws", through this online presentation. We have prepared several useful topics such as screw loosening, workability enhancement, man-hour reduction, and VA cases, with the intent to solve any problems that you may have.

If you would like to attend our screw study session, please email us your preferred date and time, and any specific topics you are interested in, and we will provide more details.

Please do not hesitate to contact our sales staff for more information.
